

Attention

THE FDA IS CONSIDERING RESTRICTIONS ON COMPOUNDED HORMONE THERAPY

Help us, help you!

FDA and NASEM Study

It's our feeling that the FDA will likely use the National Academies of Sciences, Engineering and Medicine's (NASEM) study on compounded bioidentical hormone therapy to enforce **new restrictions on compounding pharmacies**. NASEM did not take current Patients or Medical Professionals input before completing the study.

Action is needed now

If the FDA moves forward with restrictions on compounded hormones, millions of men and women will be affected.

Intervention from Congress is the best way to stop the current path of action from the FDA. However Congress won't intervene if we don't make our case.

Your input is needed now

Tell the FDA and Congress how compounded hormones have affected you,

How you can help

Pharmacies across the country are asking for your testimonials, positive or negative

Go to...

A4PC.ORG/cbhtandme

The address above will take you to Partnership for Personalized Prescriptions. Here you can share how compounded BHRT has impacted your personal life.

Now tell a friend

Power in numbers. If you have other family and friends who use compounded BHRT ask them to join us so their voices may be heard.

Thank you

Everyday Pharmacies all over the world see how compounded BHRT helps individuals, Let's all do our part to protect our access to hormones !
